REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: applicant (Lin) has disclosed an earlier publication "MediaPlex-An IEEE 802.11 Enhanced Protocol For QoS-Driven Wireless LANs" with a different inventive entity (Lin and Ho). The current application which pertains to a Home Phoneline Network Association (HPNA) network differs from the wireless LAN in that the in-band signaling model media control (MC) terminal includes the function of "associating the classified data frame with a QoS stream queue that is physically located at the MC terminal and corresponds to a classification of the data frame received from the higher layer of the MC terminal" (the non-MC terminal includes a corresponding function). The earlier publication and its corresponding patent documents (US 2005/0041670, US 6,999,442 B1, US 6,804,222 B1 and 6,862,270 B1) does not teach this feature. Further, the MC and non-MC terminals are specifically associated with the HPNA network as defined by applicant's disclosure ("An MC terminal is an HPNA terminal having functionality for controlling bandwidth allocation and transmission scheduling for all terminals within the HPNA network...", specification, paragraph 28; the non-MC terminal corresponds to a MC terminal, paragraphs 29 and 30). In contrast, the earlier publication corresponds to a wireless LAN.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melvin Marcelo whose telephone number is 571-272-3125. The examiner can normally be reached on Mon-Fri 8:30-5:00.
